Reason we take Installation Charges:

We Internet Ltd. holds a Category "A" Internet Service Provider License provided by the Department of Telecom. Our aim is to offer consumers the fastest and most affordable way to access high speed broadband services so that they can enjoy, harness and experience the power of the Internet. We are different from other operators that offer multiple plans that have download limits and try to bundle installation. They also say that they offer unlimited plans, but then there is a Fair Use Policy (FUP) applied. We value the need of the customer which above all is a steady and robust quality of service. Our plans are simple, straight forward with no confusion. A one-time installation fee is charged to ensure the best quality of service using the best equipment and infrastructure.

We Internet Ltd. Endeavours in "Making Internet Simple."
